

In January 2021, PCC was proud to be authorized by ACI (American Concrete Institute) to conduct the ACI Flatwork program and certification in the Asia Pacific region.

- Concrete Flatwork Finisher and Technician
- Specialty Commercial / Industrial Flatwork Technician

### PCC'S SPECIALTIES

- Authorized by FACE USA to implement the training of using Dipstick to measure the floor according to ACI and ASTM E1155 standards.
- Authorized by ACI to conduct the ACI Flatwork Certification programs in Asia Pacific.

### ACI COURSE MATERIAL

All the registered Participants will receive a copy of the Technical Workbook, Publication ACI CP-10.

### REQUIREMENTS FOR SUCCESSFUL ACI CERTIFICATION

- For successful Certification it is mandatory to Pass the Written Examination.
- Successful completion of the written examination shall require a minimum of score of 70% in the Theory Paper. ACI Flatwork Certification shall be valid for a period of five years from the date of completion of all applicable certification requirements.
- On request, a Re-Sit Written Examination shall be arranged on a mutually convenient day and time at a fee. ACI USA will forward the ACI Certificate together with Wallet Card (Only to those who pass the Written Examination) and Certification Result Report directly to the mailing address provided by the Examinees. The details of the successful Examinees will also appear on the ACI website.

### ACI EXAMINERS & SUPPLEMENTAL EXAMINERS

The Examiners and Supplemental Examiners are selected from the existing pool of Examiners, who have been duly Authorized by the Certification Body of ACI, USA. An independent Observer may also observe the whole Examination Process to ensure that Examination is conducted in an orderly way.
